Hoses

Press fittings ISO 12151 SAE J516

BSP adaptors BS 5200

JIC adaptors SAE J514

DIN 24° adaptors DIN 2353

ORFS adaptors ORFS J1453

Complete product range

Vitillo is your solution for any hydraulic applications. Spiral and braided hoses with metal and textile reinforcement, standard and interlock press fittings, BSP, JIC, DIN and ORFS adaptors, customized special fittings.

All our fittings and adaptors are available in Zinc chromium III plating, Zinc-nichel plating and Stainless steel.

Whatever the customer's needs, Vitillo has the answer.

Alternative Versions

Zinc Chromium III

Zinc Nickel

Stainless Steel

Applications

High performances in very extreme conditions

Note:

La Vitillo Spa offre una vasta gamma di raccordi e adattatori. Se non avete trovato qui la combinazione del filetto che stavate cercando, si prega di controllare anche negli altri cataloghi o chiedere al nostro staff tecnico.

Ex. Per adattatore JIC a BSP consultare il catalo JIC

Vitillo Spa offers a wide range of fittings and adaptors. If you have not found here the threads combination you were looking for, please check also in the other catalogues or ask to our Technical Staff.

Ex. For adapter Jic to Bsp check Jic Catalog

Gli adattatori di questa serie sono costruiti per applicazioni industriali idrauliche, oleodinamiche e pneumatiche e comunque per tutte le tipologie di impianto che prevedano alte pressioni di esercizio.

La connessione tra i componenti maschio e femmina avviene tramite una tenuta metallica, che si determina sulla sede conica a 60° presente sui prodotti. Il dimensionamento della sede è realizzato secondo le normative ISO 8434-6 e BS 5200.

Le pressioni massime di esercizio espresse nel presente catalogo fanno riferimento ad accoppiamento senza O-ring, per assemblaggi che prevedono l'uso di O-ring sul cono considerare le pressioni espresse nella tabella sotto.

The adapters of this series are constructed for hydraulic industrial applications, hydraulic and pneumatic and however for all types of systems that provide for high operating pressures.

The connection between the male and female components takes place via a metal seal, which is determined on the conical 60° seat present on the products.

The sizing of the seat is manufactured according to ISO 8434-6 and BS 5200. The maximum operating pressures expressed in this catalog refer to coupling without O-ring, for assemblies that include the use of O-rings on the cone consider the pressures expressed in the table below.

	Bar	Psi	
Massima pressione di esercizio per connessioni con cono 60° e O-ring	1/8"	--	--
	1/4"	400	5800
	3/8"	400	5800
	1/2"	350	5075
Maximum working pressure for 60° cone connection with O-ring	5/8"	350	5075
	3/4"	315	4568
	1"	250	3625
	1.1/4"	200	2900
